FAIZ AHMED

[Email](#) | [Portfolio](#) | [GitHub](#) | Nairobi, Kenya

Faiz is a full stack JavaScript software developer with two years of experience.

SKILLS

Languages: Javascript, HTML and CSS
Frameworks and Libraries: React.js, Next.js, Redux, Node.js, Bootstrap and Sass
Databases: MongoDB, PostgreSQL and MySQL
Technologies: Rest API, Git, DigitalOcean, Nginx, Azure and Wordpress

EXPERIENCE

Freelance software developer. January 2022 - Present
Currently working on exciting freelance projects with clients globally which is helping me solidify my skills and making me gain valuable experience. (React js, Next js, Node js, Bootstrap, Sass, PostgreSQL, MongoDB, Git and DigitalOcean).

Software Developer and Digital Marketing - Amazon Cellular Outfitters (Nairobi, Kenya). June 2020 - December 2021
Implemented an entire ecommerce web app from design to deployment. The web app was integrated with Google Analytics and Facebook Pixel which were useful in selling electronics countrywide (Kenya) which I was handling too. The admin panel has a content management system to run the ecommerce site and a point of sale system to assist in daily physical shop operations.
At the moment I have two variants of the site running in real time [Amazon Cellular](#) and [Alpha Supplements](#). I also created a [demo site to showcase the admin panel](#).
The code is open source on [GitHub](#) with a well written set up guide and I also have a video [guide](#) to assist in setting up the project. (Node js, Bootstrap, Sass, MongoDB, Git and DigitalOcean)

Software Tester - Techno Brain (Nairobi, Kenya). February 2020 - May 2020
I was lucky to be part of a vibrant team which was tasked by Microsoft to do testing of enterprise applications on virtual machines (deployed on Azure) and bare metal Windows Servers namely 2008, 2012, 2016, 2019 and pre-release. (Azure)

IT Support - National Cohesion and Integration Commission (Nairobi, Kenya). October 2019 - January 2020
As a fresh graduate, I got an opportunity to work in a professional environment where I did IT support which involved solving networking, printing, hardware and software issues.

EDUCATION

University of Nairobi, BSc Computer Science. September 2015 - September 2019
